| 12) Glass jar | <input type="checkbox"/> | Made of hard paper and used for storing things |

Read the text. Use the words in the answer bank to fill in the blank spaces with the correct words.

The three R's – Reduce, Reuse and Recycle

Some of the important ways to prevent our garbage from harming the Earth are to reduce, reuse and recycle our garbage. We call it the three R's. When we think of ways to reuse our things or when we collect it for the recycling bin instead of throwing it in the garbage bin, we can keep our _____ (including the air, water and soil) healthy. For example, when we recycle, less garbage will pile up in those big holes in the ground, called _____ or have to get burned off in the ovens, called _____.

In addition, when we reuse our old things instead of buying new products, like reusing an old jelly jar as a pencilholder, we help keep the air clean. In other words, because we're reusing our old products, factories don't have to make as many new products. This will save energy and reduce the amount of _____ that factories release into the air.
